eldøy
PROJECTS

"We specialize in modern data solutions, architecture and design"

PRODUCTS

Make your own white label crowdfunding site, CrowdfundHQ

We have made our own web development framework, Waveorb.

Check our open source projects on Github.

SERVICES

We can join as part of your team, or work on our own, over the web or on location. What we do is mainly:

- Rapid development of existing designs
- Advanced APIs, websites and applications
- Design and setup of professional software projects
- Technical services for marketing and strategy
- Micro services integrated into existing solutions

If the project is in the start-up phase or starts to become difficult, we can take part and get it right, either as consultants or developers. We work efficiently and deliver the highest quality.
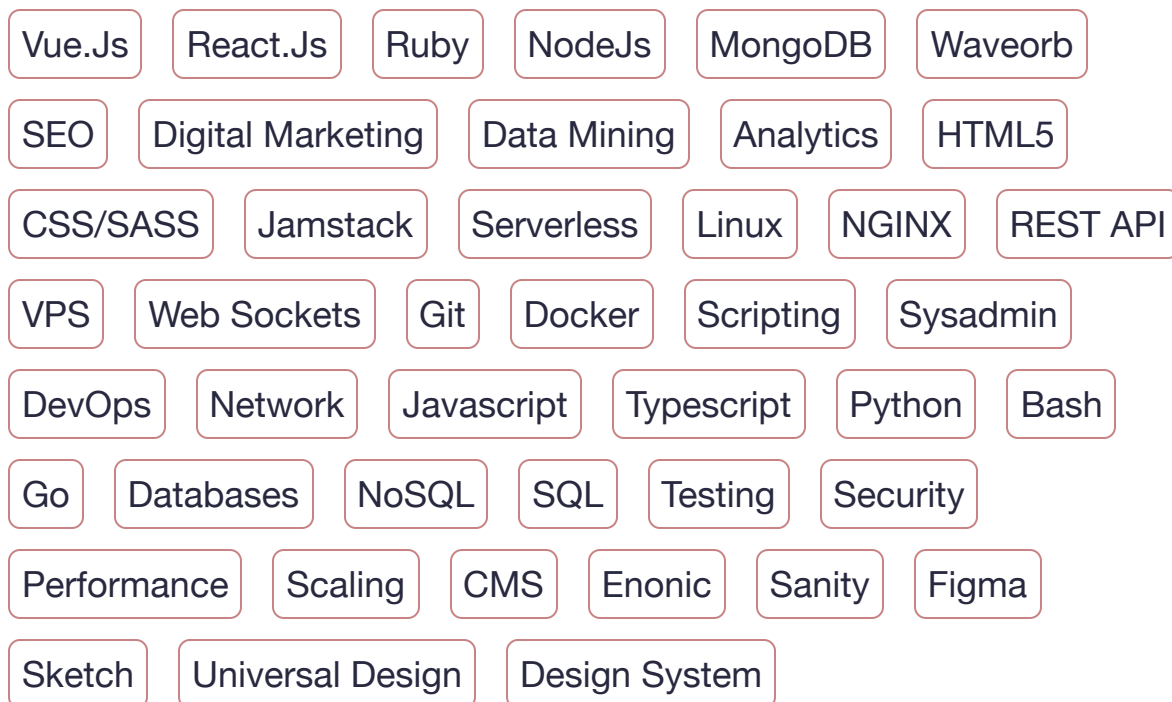

ABOUT US

Eldøy Projects is run by Vidar Eldøy. He holds a master's degree in computer science from the University of Oslo, and has been involved in the design, development and operations of computer solutions for over 15 years.

Send an email to **mail@eldoy.com** to get in touch.
